

# KETAN DESHMUKH

## ENGINEERING MANAGER

I am a passionate programmer, hardworking individual and a business-conscious software engineering leader. I have 6+ years of experience in building pivotal products. I have undertaken complex assignments, collaborated with cross-functional/geographical teams and have ensured on time deliveries. My strength lies in using Computer Science fundamentals along with common sense to keep things simple.

I use my experience in Software Engineering to come up with best possible strategies to achieve the long term goals of the product. I have built, managed and mentored highly effective product engineering teams of 3 to 10 people. I am experienced in setting sensible and effective Engineering processes. I am passionate about helping teams and individuals attain their fullest potential and find fulfilment in their work.

Looking forward to adding value to your organization !
